

CREATING CRITTERS

Items Needed: Scissors, Construction Paper, Glue

1. Divide players into small groups. Give each group a pair of scissors, glue and a variety of colors of construction paper.
2. Within a given time limit (15 minutes to half an hour) each group designs and constructs a new species of animal. They must decide on a name for their critter, tell where it lives, and tell what it eats.
3. When all groups are finished, a spokesman for each group introduces their critter to everyone.
