

GROUND TAG

Items Needed: None

Get into pairs and have all but one pair lie face down on the ground in a large circle, facing in. Leave enough space in between each pair for two people to lie down. The pair that is not lying down will be playing tag; one person will be "IT" and the other person will be chased. The chased person may lie down next to anyone at any time. Then the partner of the person he/she laid down next to must get up and become the person being chased. Once a person is tagged, he/she becomes IT and chases the other person, who tries to lie down next to someone. Runners can only run around the outside: they may not cross through the circle.
