

BLIND POLYGON

Items Needed: Blindfolds, Rope

The object of the game is for the group to form a perfect square and a triangle (and other shapes if desired) using the given length of rope. Ask participants to put on blindfolds. All participants must have at least one hand on the rope at all times. All participants must remain blindfolded until the task is completed. When the group believes the task is finished, ask them to remove their blindfolds, without moving from their current places. Using the same procedure, ask them to form any geometric shape you think is possible for the group.
